

ClearCorrect is like Invisalign but it's a newer system.

The main advantages of clear correct vs. Invisalign are:

- 1) The aligners are completely clear, whereas Invisalign aligners are slightly cloudy
- 2) The case is dispersed 4 aligners at a time so that we can monitor progress more closely and make mid course corrections if needed.
- 3) If you break an aligner, we will have the ability to fabricate a new one in house. With Invisalign we would need to order one from them which could take 2-4 weeks and will slow down your case.

For more information regarding ClearCorrect, please call Evan S Disick DDS and Ritu S Disick DDS at 415.381.4321.
